ApartMates

Fase 5: Evaluation

Realizado por:
46978 Przemyslaw Falowski
47023 Mikolaj Bujok
47043 Jakub Matjanowski

Turno 17º

Professora:
Teresa Romão

2nd December 2015

№	Problem	Heuristic	Description	Severity	Solution
1	Cannot delete shopping list	4. User control & Freedom	There is no option to delete already created shopping list	3	Add delete option
2	Cannot add custom item	4. User control & Freedom	When you are adding new element, it shows without a name.	4	Add field for name of added item.
3	Doesn't follow platform visibility standards.	2. Consistency & Standards	Buttons like: add, back, etc. don't match platform standards.	1	Change icons for navigation buttons.
4	App doesn't display name of removed friend.	9. Error reporting, diagnosis, and Recovery	When you are removing the friend from a list, you don't see his/her name on confirmation dialog.	2	Add user name to the alert.
5	Adding items to list looks the same as buying	7. Error prevention	It's confusing, because these two views looks completely the same.	2	Change icons for items added to shopping list for a 'minus'. Don't show items that are not at the shopping list.
6	New lists appear on the very bottom.	6. Flexibility & Efficiency of use	The new shopping lists is added to the bottom of view.	2	Sorting lists according to date of adding.
7	„Family" as a constant view title.	5. Visibility of system status	For all shopping list, title is "Family"	2	Adding dynamic title.
8	"Name" alert in adding friend	2. Consistency & Standards	When you don't provide address e-mail, application asks you for name.	2	Changing the alert text
9	New list button is at the end of view.	6. Flexibility & Efficiency of use	When you want to add new list, you need to go to the bottom of list. Problematic when you have many lists.	1	Moving this button to the top
10	"Back" button is not visible when list is long.	6. Flexibility & Efficiency of use	When you want to move to previous screen, you need to go to the top of the page.	1	Top panel should be always visible or should appear when you slide up just a little (like Chrome at phones).
11	Filter need to be refreshed when bought an item.	6. Flexibility & Efficiency of use	When you enable the filter that hides already bought items and mark next item as bought, filter stops to work. You need to disable it and enable again.	3	After marking item as bought, it should just disappear.
12	New custom item can't be deleted	4.User control & Freedom	When you added new custom item to your list, you are not able to remove it. You need to create new list.	4	Adding remove option
13	Horizontal view doesn't work	10. Aesthetic and Minimalist Design	When using application in horizontal view, texts are overlapping images	2	Adding images scalability.
