Briefing:

ApartMates application helps you to divide common expenses and schedule house duties with your flat mates. As a user you can be signed in to existing apartment or create your own and invite your friends who lives with you. Application automatically assign you to fulfil house duties on certain days and remind you about upcoming task to do. As a house owner you have also access to manage actual rooms in the apartment. In addition, the application also provides an announces board to easily share a flat related news.

Tasks scenarios:

- As Monika said, the cleaning is not always done properly. Sometimes her flat mates do it without putting enough effort. She wants to disapprove kitchen cleaning and approve bathroom cleaning. She wants everyone to know why she feels disappointed with others work.

- Monika just bought toilet paper, detergents to clean the bathroom and a milk for Kuba. She wants to divide the cost, so she adds new expenses into ApartMates. application automatically sums up all debts for each user and shows how much he or she needs to give back to another flat mate.

- Przemek's sister decided also to move to Lisbon and share room with her brother. Monika who is a flat administrator was asked to add Marco's sister as a new flat mate

- Monika rent a new flat, she needs to add another bathroom and living room cleaning which should be cleaned with a five days' gap.

- Monika cleaned the bathroom and she would like to add accomplishment of her duty in an app.

- One of Monika's cleanings was rejected, she wants to check what was wrong repair it and mark accomplishment again.
